

I-866-XS-TRASH

EXPLANATION OF BED LOADS - MICHIGAN TRUCK

BEDLOAD - TOTAL TRUCK BED LENGTH: 12 FEET

We use BEDLOAD rates for very dense materials such as concrete, or gravel. We can only load the truck to a depth of about 1 foot high, so we do not exceed the total GVW (Gross Vehicle Weight) of the truck, otherwise, we can be fined by the State of Michigan for exceeding the total GVW.

PLEASE REFER TO OUR RATES DOCUMENT.
